Airway Management Solutions

Video Laryngoscopy		Flexible Endoscopy	
Single-Use	C-MAC® S Video Laryngoscopes	FIVE S 3.5	
			
Reusable		FIVE 6.5	
			

Versatility

Airway management is not confined to a specific location. In ORs, emergency rooms, intensive care units through to prehospital emergency settings, medical practitioners are often confronted with the challenges of a difficult airway. KARL STORZ offers mobile and optimal solutions for managing difficult airway situations wherever and whenever they occur.

Solutions to meet your needs

Single-use or reusable? KARL STORZ provides solutions that meet specific customer needs in airway management. The C-MAC® system is thereby the ideal platform.

Semiflexible Endoscopy

C-MAC® VS

For the greatest challenges

Spinal injuries, trauma patients, maxillofacial injuries – you can count on KARL STORZ to help you master the most difficult airway situations. We are the only company to offer such a comprehensive range of endoscopic solutions for difficult airway management.

The New C-MAC® FIVE S

Excellent image quality for the most exacting requirements – the premium class in single-use endoscopy

The new single-use FIVE S (Flexible Intubation Videoendoscope) from KARL STORZ offers a single-use solution that is impressive in every respect. Its compatibility to the multifunctional C-MAC® monitor and the excellent image quality of the FIVE product family allows the new FIVE S to be perfectly integrated into the existing C-MAC® system.

- Together with the C-MAC® S video laryngoscopes, the C-MAC® system is now a complete single-use platform with impressive image quality
- Optimal maneuverability thanks to the special, ergonomic sheath design with outstanding rigidity
- Exceptionally good gliding properties, particularly when using the endotracheal tube
- Sterile packaging ensures constant availability
- Workflows gain flexibility and speed as they no longer need to be adapted to product availability

091361-06*	Flexible Intubation Videoendoscope 3.5 x 65 , direction of view 0°, angle of view 90°, working length 65 cm, outer diameter 3.5 mm, working channel diameter 1.2 mm, deflection up/down 180°/180°, sterile, for single use, package of 6, for use with E-BOX TP012	STERILE 
091261-06*	Flexible Intubation Videoendoscope 3.0 x 65 , direction of view 0°, angle of view 90°, working length 65 cm, outer diameter 2.9 mm, working channel diameter 1.2 mm, deflection up/down 180°/180°, sterile, for single use, package of 6, for use with E-BOX TP012	STERILE 
091251-06*	Flexible Intubation Videoendoscope 3.0 x 52 , direction of view 0°, angle of view 90°, working length 52 cm, outer diameter 2.9 mm, working channel diameter 1.2 mm, deflection up/down 180°/180°, sterile, for single use, package of 6, for use with E-BOX TP012	STERILE 
TP012	E-BOX , for flexible videoendoscopes (8-pin) for single use, compatible with C-MAC® Monitor 8403ZXK and C-HUB® II 20290320	
8403ZXK	C-MAC® Monitor for CMOS Endoscopes , screen size 7" with 1280 x 800 pixel resolution, two camera inputs, a USB and a HDMI port, optimized user interface, video and image capture in real time on SD card, playback of recorded video clips and still images, data transfer from SD card to USB flash drive possible, splash-proof according to IP54, suitable for wipe disinfection, shock-resistant ABS plastic housing, intelligent power management with rechargeable Li-ion batteries, VESA 75 mounting option, power adaptor for EU, UK, USA and Australia, power supply 110-240 VAC, 50/60 Hz, for use with CMOS video endoscopes including: SD Card Ultra , 16 GB Protection Cap VESA 75 Quick Clip Mains Adaptor Set	

The New C-MAC® FIVE 6.5 Designed for the Intensive Care Unit

Good hold with powerful suction

The new FIVE 6.5 (Flexible Intubation Videoendoscope) was specially developed for use in the intensive care unit. It is suitable for applications such as airway inspection and the suction of bronchial mucus as well as foreign body removal and biopsies. Its compatibility to the multifunctional C-MAC® monitor and the excellent image quality of the FIVE product family allows the new FIVE 6.5 for the intensive care unit to be perfectly integrated into the existing C-MAC® system.

- Possible to switch to an alternative endoscope within seconds:
Plan B is always at the ready
- Large working channel of 3 mm
- Ergonomic design for optimal maneuverability
- Acoustic and tactile zero position control
- Exceptional user performance
- Completely mobile, compact and space-saving, particularly in the intensive care unit

11304BCXK **Flexible Intubation Videoendoscope Set 6.5 x 65**, CMOS technology, with suction valve, direction of view 0°, angle of view 100°, working length 65 cm, total length 94 cm, working channel inner diameter 3 mm, distal tip outer diameter 6.5 mm, deflection up/down 180°/140°, for use with C-MAC® Monitor 8403ZXK and C-HUB® II 20290301

including:

Flexible Intubation Videoendoscope 6.5 x 65

Case

Pressure Compensation Cap

Leakage Tester

Tube Holder

Cleaning Brush

2x Irrigation Adaptors

Suction Valve

Bronchoscope Insertion Tube, size 4, sterile

Bronchoscope Insertion Tube, size 2, sterile

Plug

Protection Cap

Protective Film

8403ZXK **C-MAC® Monitor for CMOS Endoscopes**, screen size 7" with 1280 x 800 pixel resolution, two camera inputs, a USB and a HDMI port, optimized user interface, video and image capture in real time on SD card, playback of recorded video clips and still images, data transfer from SD card to USB flash drive possible, splash-proof according to IP54, suitable for wipe disinfection, shock-resistant ABS plastic housing, intelligent power management with rechargeable Li-ion batteries, VESA 75 mounting option, power adaptor for EU, UK, USA and Australia, power supply 110-240 VAC, 50/60 Hz, for use with CMOS video endoscopes

including:

SD Card Ultra, 16 GB

Protection Cap

VESA 75 Quick Clip

Mains Adaptor Set

C-MAC® S – The Video Laryngoscope for Single Use

The C-MAC® S video laryngoscope impresses with all the familiar benefits of the reusable C-MAC® video laryngoscopes while meeting the highest hygiene standards. In contrast to other video laryngoscopes for single use, the blade and handle form one continuous piece which significantly reduces the danger of cross-contamination, even in the case of high-risk patients. The ergonomically designed IMAGER can be reprocessed at temperatures up to 65 °C and thus completes the hygiene chain. In line with ISO 7376 standards, the C-MAC® S video laryngoscope features high tensile strength and is extremely robust.

Special Features:

- Blade and handle form one continuous piece: Optimum protection against cross-contamination
- IMAGER can be reprocessed with HLD and with mechanical cleaning up to 65 °C
- Three blade types: MACINTOSH #3, #4 and D-BLADE with short handle
- Extremely sturdy plastic material with high tensile strength
- Compatible with C-MAC® III Monitor, C-MAC® PM II and C-HUB® II
- Ergonomic handle and IMAGER

8403XSI	C-MAC® S IMAGER , with C-MAC® system interface, for manual and machine disinfection up to 65 °C and High Level Disinfection (HLD) acc. to US standards, for use with C-MAC® Connecting Cable 8403X, C-MAC® Monitor 8403ZX, C-MAC® PM 8403XD or C-HUB® II 20290301 and single-use C-MAC® S Video Laryngoscopes 051113-10, 051114-10, 051116-10	
051113-10*	C-MAC® S Video Laryngoscope MAC #3 , with MACINTOSH laryngoscope blade, size 3, for single use, package of 10, for use with C-MAC® S IMAGER 8403XS or 8403XSI	
051114-10*	C-MAC® S Video Laryngoscope MAC #4 , with MACINTOSH laryngoscope blade, size 4, for single use, package of 10, for use with C-MAC® S IMAGER 8403XS or 8403XSI	
051116-10*	C-MAC® S Video Laryngoscope D-BLADE , with laryngoscope blade for difficult intubation, for single use, package of 10, for use with C-MAC® S IMAGER 8403XS or 8403XSI	
8403XDK	C-MAC® PM Set , unit with LCD monitor and power supply for all C-MAC® video laryngoscopes, with C-MAC® system interface, screen size 3.5", documentation of images and video sequences saved on internal memory, monitor movable via two rotation axes, rechargeable Li-Ion battery, 1 h operation time, exchangeable battery pack, 2 h charging time, power management with capacity indicator, protection class IPX8, for use with C-MAC® Video Laryngoscopes 8403xxx including: C-MAC® PM Battery , rechargeable USB Data Cable Protection Cap , for reprocessing	
8403XDL	Charging Unit , for one rechargeable battery for C-MAC® PM, with power supply and mains adaptor for EU, UK, USA and AUS, power supply 100-240 VAC, 50/60 Hz, suitable for wipe disinfection, for use with Battery 8403XDA and C-MAC® PM 8403XD	
8403XDA	Battery , rechargeable Li-Ion battery for power supply of C-MAC® PM 8403XD, charging via Charging Unit 8403XDL, optimal operation time of 60 min, suitable for wipe disinfection	
8401DS	C-MAC® GUIDE , guide rod made of stainless steel with atraumatic tip, distal region is adapted to the blade shape of the C-MAC® video laryngoscope D-BLADE, fixation of endotracheal tube with the integrated tube holder possible, package of 10, for use with C-MAC® video laryngoscopes	
809125	MAGILL Forceps , modified, length 25 cm, suitable for endoscopic foreign body removal, for use with video laryngoscopes sizes 2-4
